

AMENDMENTS TO THE CLAIMSLISTING OF THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Claim 1 (Currently Amended). A network system connecting a plurality of different types of user terminal devices and a network server via a known communication system, wherein

each of said plurality of different types of user terminal devices comprises:

means for retrieving information from a removable memory storing user specific information, and

means for transmitting said user specific information and information ~~of one~~ identifying a type of terminal device of said plurality of different types of user terminal devices used by a user as specific information when said removable memory is loaded; and

said network server comprises:

means for receiving said specific information transmitted by said ~~one of said plurality of~~ type of terminal devices device used by said user,

means for registering said user specific information and said ~~user specific~~ information ~~in relation to~~ identifying said type of terminal device included in said specific information, and

means for ~~specifying~~ identifying said ~~one of said plurality~~
~~of user~~ type of terminal devices device being used by said user
and for authenticating said user by referring to said registered
information,

means for converting message information addressed to said
authenticated user to a data format compatible with said type of
terminal device being used by said user, and

means for transmitting said converted message information to
said type of terminal device being used by said user.

Claim 2 (Canceled).

Claim 3 (Previously Presented). The network system according
to claim 1, wherein said means for registering erases said
registered information when said memory means is extracted from
said terminal device.

Claims 4-9 (Canceled).
